Mr. Sandeep Aryal

April 2019

ABSTRACT

This is an online web-based platform which includes essential information of particular place in one destination profile, where all posts posted by user will be displayed. So, people can see what they can expect from the destination. On top of that the users can create and rate destination profiles. The system recommends the destinations by analyzing user profiles and activities they are engaged with. Also, we aim to encourage travelers to share their travel moments. Moreover, the quality of recommendation and rating in this system is directly proportional to the amount of user base that we will have and their engagement ratio. Basically, this system creates the influencer ecosystem to encourage other people to travel more.

Keywords: *Sentiment Analysis, Recommendation, Travel Feed, K- means Clustering*

TABLE OF CONTENTS

1. Introduction	1
2. Problem Statement	1
3. Objectives	2
4. Scope and Limitations	2
5. Research Methodology	2
5.1. Literature Review	2
5.2. Data Collection	4
5.3. Feasibility Study	4
5.3.1. Technical Feasibility	4
5.3.2. Operational Feasibility	5
5.3.3. Economical Feasibility	5
5.3.4. Schedule Feasibility	5
5.4. Analysis and Design	5
5.4.1. E-R Diagram	6
5.4.2. DFD Diagram	7
5.4.3. UML Diagram	8
5.5. Proposed System	9
5.6. Implementation Tools	10
5.6.1. HTML, CSS, JAVASCRIPT	10
5.6.2. Laravel	11
6. Working Schedule	11
